

Valley Grinding

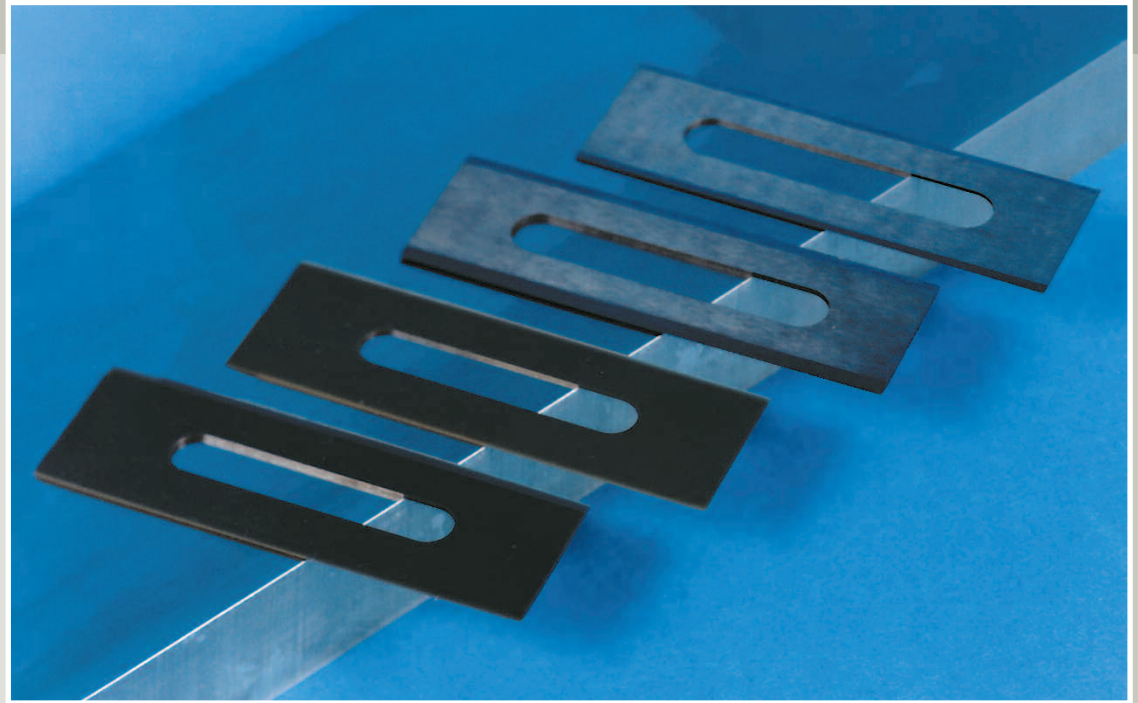

Ceramic and Tungsten Carbide Razor Blades

Longer Run Times, Reduced Downtime Provide Increased Profitability

At Valley Grinding, we provide the best of both worlds by offering both Ceramic and Tungsten Carbide Razor Blades in a variety of sizes and thickness to meet virtually any customer slitting needs.

- Smoother surface of Ceramic Blades provide superior lubricity and reduce friction up to 24% - making them ideal for film converting or other adhesive applications.
- Tungsten Carbide Blades feature the sharpest cutting edges, resist nicking and last tens to hundreds of times longer than regular steel blades.
- Instead of paying more for new blades, worn Valley Grinding Razors can generally be sharpened to original cut quality up to 4 times.
- Solid Ceramic and Tungsten Carbide Razors provide improved cut quality...resulting in fewer product rejects.
- Razors made with Valley Grinding's Double Bevel Included Technology results in less web deflection. Less web deflection reduces rippled edges and returned product.
- Longer run time of solid Ceramic and Tungsten Carbide blades means fewer blade changes and less downtime.
- Greater safety from less razor handling.

Whatever your slitting need might be, from the easiest to the most difficult applications, Valley Grinding can provide the razor you need. For the finest product quality, industry expertise and "cutting edge" technology, you can rely on the experts at Valley Grinding.
